Subject: Updates on new Initiatives of the Company

Respected Sir/Madam,

We are pleased to announce the successful registration of the Company's first carbon credit 'pilot project' under the voluntary carbon market.

This pioneering project, which incorporates various ICS performing practices in sustainable and regenerative agriculture, shall led to the generation of an estimated 200000 carbon credits, expected to be valued at around ₹ 4.98 crore in the voluntary market. The project will undergo rigorous auditing under ISO 14065 by independent third party Verification and Validation Body, with the carbon credits to be issued by renowned voluntary carbon market standard.

Looking ahead, Axita Cotton plans to launch Eleven additional carbon credit projects, aiming to generate approximately 2.2 million credits over the next seven years. These projects are expected to achieve a market value of approximately ₹ 55 crore, supported by the anticipated rise in carbon credit prices, due to the current exponential growth in the carbon market.

Axita Cotton shall employ the most advanced methodologies in developing this carbon credit pilot project, leveraging cutting-edge technologies such as GIS, Environmental Simulation Modeling, and DMRV systems (Digital Monitoring, Reporting, and Verification). This initiative will significantly benefit local farmer groups by aligning Axita Cotton Limited with five of the United Nations' Sustainable Development Goals and providing financial incentives through the revenue generated from these carbon credits.

The Company is also taking initiative to adopt Direct Air Capture (DAC) technology to generate real carbon removals under the Cabon Capture Utilisation and Storage (CCUS) scope and achieve CO2 neutrality goals in coming years.
